NEUROPEPTIDES

Neuropeptides (1990) **16**, 227-232
© Longman Group UK Ltd 1990
0143-4179/90/0016-0227/$10.00

Subject Index to Volumes 15/16

A

Acetylcholine: actions on neurons in the rat ventral hippocampus, **16**.83
Adrenal cortex
  effects of chronic stress on *in vivo* pituitary-adrenocortical responses to corticotropin releasing hormone, **15**.143
  long-term effects of neuropeptide Y on, **16**.9
  stimulation by calcitonin gene-related peptide of, **16**.129
Adrenal medullary cells, cultured bovine
  effects of bradykinin bombesin and neurotensin on receptor-stimulated formation of inositol phosphates, **15**.187
  stimulation by angiotensin II of proenkephalin A mRNA expression, **16**.141
Adrenocorticotropic hormone (ACTH)
  adaptation of ACTH responses to chronic stress, **15**.143
  hypnogenic properties in the rat of derivatives of, **15**.61
  long-term effects of neuropeptide Y on, **16**.9
  lymphocyte $ACTH_{1-39}$, quantitative determination of, **15**.11
  metyrapone effects on, after chronic opiate receptor stimulation in man, **15**.129
  modulation of gonadotropin release at pituitary level by Leu-enkephalin and, **16**.135
Aldosterone
  long-term effects of neuropeptide Y on, **16**.9
  stimulation by calcitonin gene-related peptide of, **16**.129
Aminopeptidases
  inhibition by thiol derivatives of acidic amino acids, **16**.163
  substrate specificity of a thyrotropin releasing hormone-hydrolysing pyroglutamate aminopeptidase, **15**.31
Analgesia *see* Morphine
Angiotensin II
  memory-facilitating effect of, cholinergic influence on, **16**.157
  stimulation of proenkephalin A mRNA expression in cultured bovine adrenal chromaffin cells, **16**.141
Angiotensin III formation: inhibition by thiol derivatives of acidic amino acids, **16**.163
Antinociception
  induction by intraventricular β-endorphin of, enhancement by thiorphan and bestatin of, **16**.91
  interactions of cholecystokinin and FLFQPQRF-NH2 with μ and δ opioid activity in rat spinal cord, **16**.213
  interactions of proglumide lorglumide and benzotript with brain opioid binding sites, **16**.51
Apomorphine
  dopaminergic supersensitivity induced by, effects of cyclo(leu-gly) on, **16**.207
  effects on sleep in the rat of, **15**.75
Arginine vasopressin *see* Vasopressin
Aspartate thiol inhibition of angiotensin III formation, **16**.163
Atrial natriuretic factor: distribution of binding sites as a function of brain development in the rat, **16**.63

B

Benzotript: interaction with brain opioid binding sites, **16**.51
Bestatin
  effects on antinociception and Met-enkephalin release induced by intraventricular β-endorphin, **16**.91
  effects on locomotion in mice, **15**.89
Blattella germanica (German cockroach), structure of the hypertrehalosemic neuropeptide of, **15**.107
Bombesin
  effects on cell-mediated cytotoxicity against human tumour cells, **16**.25
  effects of receptor-stimulated formation of inositol phosphates in cultured bovine adrenal medullary cells, **15**.187
Bradykinin: effect on receptor-stimulated formation of inositol phosphates in cultured bovine adrenal medullary cells, **15**.187
Brain (*see also* Hypothalamus)
  atrial natriuretic factor binding sites in, distribution during development in the rat of, **16**.63
  benzodiazepine ligand octadecaneuropeptide in, immunocytochemical localization of, **15**.17
  cholecystokinin octapeptide and CCK mRNA in, distribution during development in the rat of, **15**.201
  choline acetyltransferase of, selection of synthetic peptides from, **16**.149
  cholinergic influence on memory facilitation induced by angiotensin II in rats, **16**.157
  endothelin receptors in, **16**.195
  mesotocin in, presence in the brushtail possum of, **16**.121
  monoaminergic transmission
    apomorphine-induced nigrostriatal dopaminergic supersensitivity, effects of cyclo(leu-gly) on, **16**.207
    effects of cholecystokinin analogue JMV 236 on, **15**.37

effects of neurotensin on dopaminergic transmission, **15**.169
effects of somatostatin fragments on, **16**.181
mRNAs coding for preprocholecystokinin and preprosomatostatin in rat neocortex, effect of partial removal of frontal or parietal bone on, **15**.115
α-MSH concentrations in, effects in the rat of chronic ethanol treatment on, **15**.139
somatostatin inhibition of VIP- and isoproterenol-stimulated cyclic AMP accumulation in, **15**.235
somatostatin level and binding in, effects of acute and chronic cocaine administration on, **16**.1
somatostatin processing in cerebro-cortical cells, influence of thyroid hormones on, **15**.25
thiol-dependent membrane-bound metallo-endopeptidase functioning in degradation of luteinizing hormone-releasing hormone, **16**.187
thyrotropin releasing hormone content in, effect of fenfluramine on, **15**.195
ventricular fluid neuropeptides in Parkinson's disease patients, **15**.219
Bromocriptine, effects on sleep in the rat of, **15**.75

C

Calcitonin gene-related peptide
hypoprolactinemic effect in the rat of, **16**.109
release of, following stimulation of the superior sagittal sinus in the cat, **16**.69
stimulation of adrenocortical function in the isolated perfused rat adrenal gland by, **16**.129
Calcium-dependent release of neuromedin N and neurotensin from mouse hypothalamus, **15**.111
Carcinoma, exocrine pancreatic, effect of neuropeptide Y and peptide YY on, **15**.101
Cerebro-cortical cells *see* Brain
Cerebrospinal fluid: somatostatin-like immunoreactivity in patients with Parkinson's disease, **15**.219
Cholecystokinin (CCK)
brain CCK- and opioid-binding sites, affinities of antagonists proglumide lorglumide benzotript and L-364718 for, **16**.51
distribution of CCK-octapeptide and CCK mRNA in rat brain during development, **15**.201
gene expression in rat neocortex of, effect of partial removal of frontal or parietal bone on, **15**.115
interaction with μ and δ opioid antinociception in the rat spinal cord, **16**.213
JMV 236 analogue of, effects on food intake and brain monoamines in the rat of, **15**.37
Choline acetyltransferase, porcine brain, selection of synthetic peptides from, **16**.149
Cocaine: effects of acute and chronic administration on somatostatin level and binding in the rat brain, **16**.1
Cockroach, German *see Blattella germanica*
Colon, human: distribution and actions of galanin and vasoactive intestinal peptide, **16**.77
Copulatory activity, neuropeptide Y-induced inhibition of, **16**.169
Corticosterone secretion
effect of chronic stress on, **15**.143
long-term effects of neuropeptide Y on, **16**.9
stimulatory action of calcitonin gene-related peptide on, **16**.129
Corticotropin *see* Adrenocorticotropic hormone
Corticotropin-like intermediate lobe peptide (CLIP), effects on sleep in the rat of, **15**.61, **15**.75
Corticotropin Releasing Hormone (CRH or CRF)
coexistence with other neuropeptides in the hypothalamic paraventricular nucleus of the sheep, **15**.227
hypnogenic properties in the rat, **15**.61
in vitro release of hypothalamic β-endorphin by, **16**.33
pituitary-adrenocortical responses to, effects of chronic stress on, **15**.143
Cortisol, metyrapone effects on, after chronic opiate receptor stimulation in man, **15**.129
Cyclic AMP, VIP- and isoproterenol-stimulated accumulation in rat cerebro-cortical cells of, somatostatin inhibition of, **15**.235
Cyclo(His-Pro) levels: acute alterations after oral ingestion of glucose, **15**.55
Cyclo(leu-gly), effects on nigrostriatal dopaminergic supersensitivity of, **16**.207
Cytotoxicity against human tumour cells, cell-mediated, neuropeptide regulation of, **16**.25

D

Dopamine
effects of cholecystokinin analogue JMV 236 on metabolites of, **15**.37
effects of cyclo(leu-gly) on apomorphine-induced receptor supersensitivity, **16**.207
effects of DA agonists on sleep in the rat, **15**.75
effects of neurotensin on regional brain concentrations of, **15**.169
effects of somatostatin on regional brain concentrations of, **16**.181
in vitro release of hypothalamic β-endorphin by, **16**.33
Drug addiction
effects of cocaine administration on somatostatin level and binding in the rat brain, **16**.1
effects of ethanol and opiate on axonal transport of substance P in rat vagus nerves, **16**.15
effects of metyrapone on β-endorphin adrenocorticotropic hormone and cortisol levels in heroin addicts, **15**.129
effects of opioid treatment on phagocytosis in *Tetrahymena*, **16**.115
Dynorphin
heart levels of, during the development of spontaneously hypertensive rats, **15**.43
inhibition of growth hormone releasing peptide binding by, non-opioid pattern of, **15**.133
prodynorphin peptides release from rat spinal cord, **16**.201

E

β-Endorphin
antinociception and Met-enkephalin release induced by, enhancement by thiorphan and bestatin of, **16**.91
in vitro release from hypothalamus by arginine vasopressin corticotropin releasing hormone and 5-hydroxytryptamine of, **16**.33
metyrapone effects on levels of, after chronic opiate receptor stimulation in man, **15**.129
Endothelin(s)
effects on motor activity in rats, **16**.21
receptors in various regions of rat brain, **16**.195

Enkephalin(s)
angiotensin II-stimulated expression of proenkephalin A mRNA in cultured bovine adrenal chromaffin cells, **16**.141
in vitro modulation of gonadotropin release at pituitary level by Leu-enkephalin, **16**.135
induction by intraventricular β-endorphin of Met-enkephalin, enhancement by thiorphan and bestatin of, **16**.91
Enkephalin-degrading peptidases, effects on locomotion in mice of inhibitors of, **15**.89
Ethanol
effect on axonal transport of substance P in rat vagus nerves, **16**.15
effects on α-MSH concentrations in rat brain and pituitary, **15**.139
Extrapyramidal disorders with hyperkinesia, ventricular fluid neuropeptides in patients with, **15**.219

F

Fenfluramine: effect on thyrotropin releasing hormone content in rat brain and spinal cord, **15**.195
FLFQPQRF-NH2 (FMRFamide-like peptide): interaction with μ and δ opioid antinociception in rat spinal cord, **16**.213
Food intake
acute alterations of cyclo(His-Pro) levels after oral ingestion of glucose, **15**.55
effect in the rat of cholecystokinin analogue JMV 236 on, **15**.37
effect of starvation on stimulation by a thyrotropin releasing hormone precursor TRH-Gly of thyrotropin and prolactin secretion in rats, **16**.57
Frontal bone, partial removal of: effect on concentrations of mRNAs coding for preprocholecystokinin and preprosomatostatin in rat neocortex, **15**.115

G

Galanin, distribution and actions in the human colon of, **16**.77
Gene expression
cholecystokinin
in different structures of rat brain during development, **15**.201
effect of partial removal of frontal or parietal bone, **15**.115
enkephalin, stimulation in cultured bovine adrenal chromaffin cells by angiotensin II of, **16**.141
proopiomelanocortin, in the intermediate lobe of the rat pituitary gland, **16**.173
somatostatin, effect of partial removal of frontal or parietal bone on, **15**.115
thyrotropin releasing hormone, regulation in the rat anterior hypothalamus by thyroid hormone of, **15**.49
Glucose, acute alterations of cyclo(His-Pro) levels after oral ingestion of, **15**.55
Glutamate
inhibition of angiotensin III formation by a thiol derivative of, **16**.163
responses of ventral hippocampus neurons to, **16**.83
Gonadotropins: *in vitro* modulation by Leu-enkephalin and adrenocorticotropic hormone of release of, **16**.135
Growth hormone releasing factor (GRF), effect on prolactin secretion of intrahypothalamic injection of, **15**.153
Growth hormone releasing peptide *see* SK&F 110679

H

Heart
dynorphin-A levels in, during the development of spontaneously hypertensive rats, **15**.43
interaction of neuropeptide Y with rat cardiac membranes, **15**.157
noradrenaline release in, non-involvement of protein kinase C in inhibition by neuropeptide Y of, **15**.179
Hippocampus
rat ventral, two actions of vasopressin on, **16**.83
see also Brain
5-Hydroxytryptamine
effect of fenfluramine on concentrations in rat brain and spinal cord of, **15**.195
in vitro release of hypothalamic β-endorphin by, **16**.33
Hypertension: alterations of heart dynorphin-A in the development of spontaneously hypertensive rats, **15**.43
Hyperthermic actions of morphine, effect of thyrotropin releasing hormone on development of tolerance to, **15**.213
Hypertrehalosemic neuropeptide of the German cockroach *Blattella germanica*, **15**.107
Hypothalamus (*see also* Brain)
calcium-dependent release in the mouse of neuromedin N and neurotensin from, **15**.111
coexistence of neuropeptides in the paraventricular nucleus of the sheep, **15**.227
in vitro release of β-endorphin by arginine vasopressin corticotropin releasing hormone and 5-hydroxytryptamine, **16**.33
mesotocin in, presence in the brushtail possum of, **16**.121
monoaminergic transmission in, differential effects of somatostatin fragments on, **16**.181
proteolytic resistance and biological activity of N-methylated analogues of [pGlu^6]substance P$_{6\text{-}11}$ in, **16**.41
reciprocal regulation of preprothyrotropin releasing hormone mRNA by thyroid hormone in, **15**.49
somatostatin in the ventromedial nucleus may affect gastric somatostatin levels in rats, **16**.97
stimulation of prolactin secretion by injection of somatostatin into, **15**.153
Hypothyroidism *see* Thyroid hormones

I

Inositol phosphate formation in cultures of bovine adrenal medullary cells, effects of bradykinin bombesin and neurotensin on, **15**.187
Intestine
distribution and actions of galanin and vasoactive intestinal peptide in the human colon, **16**.77
neuromedin U-like immunoreactivity in, **15**.1
Isoproterenol-stimulated cyclic AMP accumulation in rat cerebro-cortical cells, somatostatin inhibition of, **15**.235

J

JMV 236 (cholecystokinin analogue): effects on food intake and brain monoamines in the rat, **15**.37

L

L-364 718 (cholecystokinin antagonist): affinities for brain CCK- and opioid-binding sites, **16**.51
Leu-enkephalin *see under* Enkephalin(s)
Locomotion *see* Motor activity
Lorglumide, interaction with brain opioid binding sites of, **16**.51
Luteinizing hormone-releasing hormone, thiol-dependent membrane-bound metallo-endopeptidase functioning in degradation of, **16**.187
Lymphocyte adrenocorticotropic hormone, quantitative measurement of, **15**.11

M

Marsupial(s): mesotocin in the brain and plasma of the brushtail possum, **16**.121
Melanocyte stimulating hormone (MSH)
  α-MSH, effects of chronic ethanol treatment on concentrations in rat brain and pituitary of, **15**.139
  desacetyl-α-MSH and MSH Inhibiting Factor, hypnogenic properties of, **15**.61
Memory facilitation induced by angiotensin II in rats, cholinergic influence on, **16**.157
Mesotocin: in the brain and plasma of the brushtail possum, **16**.121
Met-enkephalin *see under* Enkephalin(s)
Metyrapone: effects on β-endorphin adrenocorticotropic hormone and cortisol levels after chronic opiate receptor stimulation in man, **15**.129
Migraine, and release of vasoactive peptides caused by stimulation of the superior sagittal sinus in the cat, **16**.69
Monoaminergic neurotransmission *see under* Brain *and also individual monoamines*
Morphine
  analgesic action of, effect of cholecystokinin antagonists proglumide lorglumide and benzotript on, **16**.51
  analgesic and hyperthermic actions of, effect of thyrotropin releasing hormone on the development of tolerance to, **15**.213
Motor activity
  effect in rats of endothelins on, **16**.21
  effects in rats of somatostatin fragments on, **16**.181
  role of delta opioid receptors in the effects of enkephalinase inhibitors in mice on locomotion, **15**.89
MSEL-neurophysin, identification in *Xenopus laevis* neurointermediate pituitary of neurophysin homologous to, **15**.123
Muscle, human colon external: distribution and actions of galanin and vasoactive intestinal peptide, **16**.77

N

α-Neoendorphin release from rat spinal cord, **16**.201
Neuroblastoma cells: thiol-dependent membrane-bound metallo-endopeptidase functioning in degradation of luteinizing hormone-releasing hormone, **16**.187
Neuromedin N, calcium-dependent release from mouse hypothalamus of, **15**.111
Neuromedin U-like immunoreactivity in rat intestine, **15**.1
Neuropeptide Y
  effect on growth of exocrine pancreatic carcinoma, **15**.101
  inhibition of male copulatory activity, **16**.169
  inhibition of noradrenaline release in mouse atria, **15**.179
  interaction with rat cardiac membranes, **15**.157
  long-term effects on rat adrenal cortex, **16**.9
  release of, effect of stimulation of the superior sagittal sinus in the cat on, **16**.69
Neurophysins: identification of two types in *Xenopus laevis* neurointermediate pituitary, **15**.123
Neurotensin
  calcium-dependent release from mouse hypothalamus, **15**.111
  coexistence with other neuropeptides in the hypothalamic paraventricular nucleus of the sheep, **15**.227
  effect on cell-mediated cytotoxicity against human tumour cells, **16**.25
  effects on receptor-stimulated formation of inositol phosphates in cultured bovine adrenal medullary cells, **15**.187
  effects on regional brain concentrations of dopamine serotonin and their main metabolites, **15**.169
Neutrophils, human, differential effects of two C-terminal peptides of substance P on, **16**.103
Noradrenaline
  hypothalamic and striatal concentrations of, effects of somatostatin fragments on, **16**.181
  release in mouse atria of, inhibition by neuropeptide Y of, **15**.179
NPV *see* Paraventricular nucleus

O

Octadecaneuropeptide (ODN), endogenous benzodiazepine ligand, immunocytochemical localization in the rat brain of, **15**.17
8-OHDPAT (serotonin agonist), effects on sleep in the rat of, **15**.75
Opiate(s)
  effect on axonal transport of substance P in rat vagus nerves, **16**.15
  receptors, metyrapone effects on β-endorphin adrenocorticotropic hormone and cortisol following chronic stimulation of, **15**.129
  see also individual opiates
Opioid receptors
  cardiac, and alterations of heart dynorphin-A in the development of spontaneously hypertensive rats, **15**.43
  effect of chronic opioid treatment on phagocytosis in *Tetrahymena*, **16**.115
  interactions of cholecystokinin and FLFQPQRF-NH2 with, **16**.213
  interactions of cholecystokinin antagonists proglumide lorglumide benzotript and L-364 718 with, **16**.51
  role in the effects of enkephalinase inhibitors on locomotion in mice of, **15**.89
Oxytocin: coexistence with other neuropeptides in the hypothalamic paraventricular nucleus of the sheep, **15**.227

P

Pain
  migraine, and release of vasoactive peptides caused by stimulation of the superior sagittal sinus in the cat, **16**.69
  spinal cord transmission of, modulation by thyrotropin releasing hormone systems of, **15**.161
  see also Antinociception

Pancreatic carcinoma cells, neuropeptide Y and peptide YY stimulation of growth of, **15**.101
Pancreatic polypeptide (PP), interaction with rat cardiac membranes of, **15**.157
Paraventricular nucleus of the hypothalamus, coexistence of neuropeptides in, **15**.227
Parietal bone, partial removal of: effect on concentrations of mRNAs coding for preprocholecystokinin and preprosomatostatin in rat neocortex, **15**.115
Parkinson's disease, ventricular fluid neuropeptides in patients with, **15**.219
Peptide YY
  effect on growth of exocrine pancreatic carcinoma cells of, **15**.101
  interaction with rat cardiac membranes of, **15**.157
Phagocytosis in *Tetrahymena*, effect of chronic opioid treatment on, **16**.115
Pituitary gland
  chronic stimulation of opiate receptors and, **15**.129
  gonadotropin release by, *in vitro* modulation by Leu-enkephalin and adrenocorticotropic hormone of, **16**.135
  mesotocin in, presence in the brushtail possum of, **16**.121
  α-MSH concentrations in, effects in the rat of chronic ethanol treatment on, **15**.139
  neurophysins in, in *Xenopus laevis*, **15**.123
  pituitary-adrenocortical responses to corticotropin releasing hormone, effects of chronic stress on, **15**.143
  proopiomelanocortin gene expression in, **16**.173
  thyrotropin and prolactin secretion by, stimulation by a thyrotropin releasing hormone precursor TRH-Gly of, **16**.57
Possum, brushtail, mesotocin in brain and plasma of, **16**.121
Prodynorphin peptides release from rat spinal cord, **16**.201
Proglumide: interaction with brain opioid binding sites, **16**.51
Prolactin secretion
  effect of calcitonin gene-related peptide on, **16**.109
  stimulation by intrahypothalamic injection of somatostatin of, **15**.153
  stimulation by thyrotropin releasing hormone precursor TRH-Gly of, effect of starvation on, **16**.57
Proopiomelanocortin (POMC)
  biosynthesis in the pituitary gland and in the central nervous system of, effects of chronic ethanol treatment on, **15**.139
  effects on sleep in the rat of peptides derived from, **15**.61, **15**.75
  gene expression in the intermediate lobe of the rat pituitary gland, **16**.173
Protein kinase C, non-involvement in inhibition of noradrenaline release by neuropeptide Y in mouse atria, **15**.179

S

Serotonin
  agonist 8-OHDPAT, effect on sleep in the rat of, **15**.75
  effects of neurotensin on brain concentrations of, **15**.169
  effects of somatostatin fragments on brain concentrations of, **16**.181
  metabolites of, effects in the rat of cholecystokinin analogue JMV 236 on levels of, **15**.37
SK&F 110679 (growth hormone releasing peptide): a non-opioid pattern characterizes inhibition of binding by dynorphin-related peptides, **15**.133
Sleep in the rat, proopiomelanocortin-derived peptides and, **15**.61, **15**.75
Somatostain
  brain levels and binding of, effect of acute and chronic cocaine administration on, **16**.1
  coexistence with other neuropeptides in the hypothalamic paraventricular nucleus of the sheep, **15**.227
  effects on cell-mediated cytotoxicity against human tumour cells, **16**.25
  gene expression in rat neocortex of, effect of partial removal of frontal or parietal bone on, **15**.115
  inhibition of VIP- and isoproterenol-stimulated cyclic AMP accumulation in rat cerebro-cortical cells, **15**.235
  injection into hypothalamus of, stimulation of prolactin secretion by, **15**.153
  processing in cultured cerebro-cortical cells of, influence of thyroid hormones on, **15**.25
  relationship in rats between ventromedial hypothalamic and gastric concentrations of, **16**.97
  SS28 fragments of, effects on central monoaminergic neurotransmission in rats of, **16**.181
  in ventricular fluid of patients with Parkinson's disease, **15**.219
Spinal cord
  intrathecal administration of thiorphan and bestatin enhances the antinociception and Met-enkephalin release induced by intraventricular β-endorphin, **16**.91
  opioid antinociception in, differential interactions of cholecystokinin and FLFQPQRF-NH2 with, **16**.213
  pain transmission in, modulation by thyrotropin releasing hormone systems of, **15**.161
  prodynorphin peptides release from, modulation *in vitro* of, **16**.201
  thyrotropin releasing hormone content in, effect of fenfluramine on, **15**.195
  vasoactive intestinal polypeptide-related peptides in, **16**.219
  see also Cerebrospinal fluid
Spontaneously hypertensive rats *see* Hypertension
Starvation: effect on stimulation by thyrotropin releasing hormone precursor TRH-Gly of thyrotropin and prolactin secretion in rats, **16**.57
Steroids *see* Aldosterone; Corticosterone
Stomach: ventromedial hypothalamic somatostatin may affect gastric somatostatin concentrations in rats, **16**.97
Stress
  coordinate regulation of endocrine and central proopiomelanocortin systems in response to, **16**.33
  effects on *in vivo* pituitary-adrenocortical responses to corticotropin releasing hormone, **15**.143
  effects on mesotocin secretion in the brushtail possum, **16**.121
  hypoprolactinaemic effect of calcitonin gene-related peptide in response to, **16**.109
  interrelation between sleep and proopiomelanocortin derivatives and, **15**.61
Substance P(SP)
  axonal transport in rat vagus nerves of, effect of ethanol and opiates on, **16**.15
  C-terminal peptides of, differential effects on human neutrophils of, **16**.103
  effect on cell-mediated cytotoxicity against human tumour cells, **16**.25
  proteolytic resistance and biological activity of N-methylated analogues of [pGlu^6]SP$_{6-11}$, **16**.41

release of, effect of stimulation of the superior sagittal sinus in the cat on, **16**.69
Superior sagittal sinus, vasoactive peptide release caused by stimulation in the cat of, **16**.69

T

Tetrahymena: effect of chronic opioid treatment on phagocytosis, **16**.115
Thiorphan
effects on locomotion in mice of, role of delta opioid receptors in, **15**.89
intrathecal administration enhances the antinociception and Met-enkephalin release induced by β-endorphin, **16**.91
Thyroid hormones
influence on somatostatin processing in cultured cerebro-cortical cells, **15**.25
reciprocal regulation of preprothyrotropin releasing hormone mRNA in the rat anterior hypothalamus, **15**.49
Thyrotropin: secretion in rats, stimulation by a thyrotropin releasing hormone precursor TRH-Gly of, **16**.57
Thyrotropin releasing hormone (TRH)
bulbospinal and intraspinal TRH systems, modulation of spinal cord pain transmission by, **15**.161
concentrations in the rat brain and spinal cord of, effect of fenfluramine on, **15**.195
effect on the development of tolerance to the analgesic and hyperthermic actions of morphine, **15**.213
precursor TRH-Gly of, stimulation of thyrotropin and prolactin secretion in rats by, **16**.57
reciprocal regulation of preproTRH mRNA in the rat anterior hypothalamus by thyroid hormone: dissociation from TRH concentrations during hypothyroidism, **15**.49
TRH hydrolysing pyroglutamate aminopeptidase from guinea-pig brain, substrate specificity of, **15**.31
Trichosurus vulpecula (brushtail possum), mesotocin in the brain and plasma of, **16**.121
Tumour cells
effect of neuropeptide Y and peptide YY on exocrine pancreatic carcinoma cells, **15**.101
neuropeptide regulation of cell-mediated cytotoxicity against, **16**.25
thiol-dependent membrane-bound metallo-endopeptidase functioning in degradation of luteinizing hormone-releasing hormone in neuroblastoma cells, **16**.187

V

Vagus nerves
axonal transport of substance P in, effects of ethanol and opiate on, **16**.15
ventromedial hypothalamic somatostatin may affect gastric somatostatin concentrations in rats *via*, **16**.97
Vasoactive intestinal polypeptide (VIP)
coexistence with other neuropeptides in the hypothalamic paraventricular nucleus of the sheep, **15**.227
distribution and actions in the human colon of, **16**.77
release of, following stimulation of the superior sagittal sinus in the cat, **16**.69
somatostatin inhibition of VIP-stimulated cyclic AMP accumulation in rat cerebro-cortical cells, **15**.235
VIP-related peptides in the rat spinal cord, **16**.219
Vasopressin
actions on neurons in the rat ventral hippocampus, **16**.83
in vitro release of hypothalamic β-endorphin by, **16**.33
Ventromedial nucleus of the hypothalamus: somatostatin concentrations may affect gastric somatostatin levels in rats, **16**.97
VLDV-neurophysin, identification in *Xenopus laevis* of neurophysin homologous to, **15**.123

X

Xenopus laevis: identification of two types of neurophysins in neurointermediate pituitary, **15**.123

NEUROPEPTIDES
